"It's really a challenge," said Jeff Masters, director of the Weather Underground, a website that tracks weather patterns. Ike will be the first storm since the famous hurricane of 1935 to make landfall in the United States and the first to hit the Gulf Coast, a country with more than 300 million people and a vast economy. "The whole weather business is different than it was 100 years ago, and Ike is going to present us with the biggest challenge," Masters said. "I don't know that I've ever heard anybody describe the climate as being so unusual for so long." Ike has been predicted to be an extremely powerful hurricane -- the most powerful ever to hit the U.S. mainland. The most intense hurricane on record in the U.S. was Hurricane Camille in 1969, which had maximum winds of 190 mph. Hurricane Camille was a Category 3 storm at landfall, meaning it was an average-sized hurricane at landfall. Ike is expected to be a Category 2 storm. Ike's path will be decided in the 82157476af
